

Chart showing the time for execution for
algorithms vs test-cases

Test-case input length	Gift Wrapping algorithm	Graham Scan algorithm	Quick Hull algorithm
100	3.5e-05	2.9e-05	1.2e-05
1000	0.000267	0.000266	7.3e-05
2000	0.000521	0.000438	0.000537
5000	0.000573	0.000532	0.00032
10000	0.001183	0.001057	0.000623

These test-cases are generated using “SPOJ Toolkit Test-case generator”.

And the test-cases are uploaded in github repository.
